

Technology Assignments for Navigation Channel and Future Maintenance Dredge Areas

PRELIMINARY DRAFT

Note: All Concentrations greater than RAL alternative are less than 18 feet deep in the FMD and 15 feet in the Navigation Channel. The diagram is based on no PTW or sediment concentrations found below these depths.

DOCR – Depth of contamination to be removed based on Remedial Action Levels (RALs)
 EMNR – Enhanced monitored natural recovery
 FMD – Future maintenance dredge
 MNR – Monitored natural recovery
 Nav – Navigation channel
 PTW – Principal threat waste
 SMA – Sediment Management Area
